Overview

Thank you for purchasing the RW1 watch winder. Your new winder is suitable for any watch with an automatic movement. Please read through all instructions prior to operating.

Note:

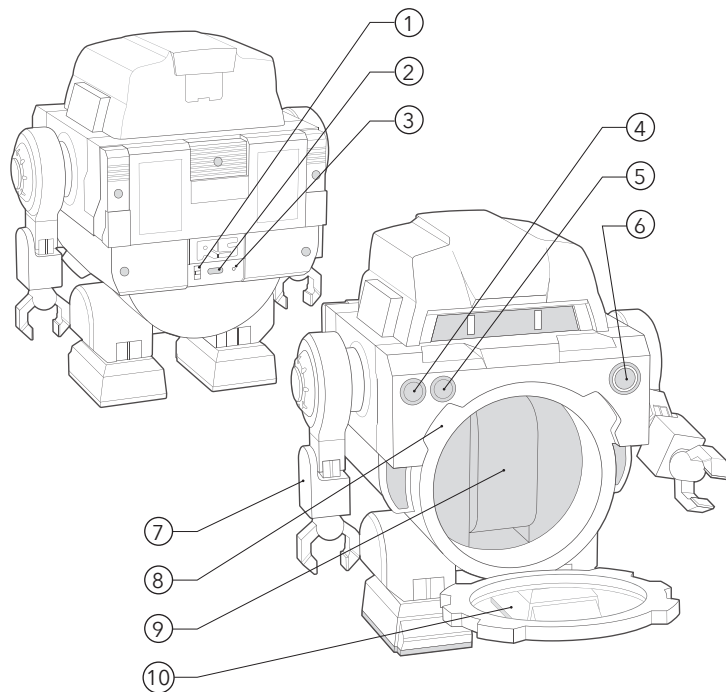

The RW1 contains a lithium-ion battery. Please store correctly and pay attention to regulations when traveling. The RW1 also contains ultraviolet LED lights. In order to protect eyes and skin from exposure, please do not attempt to remove or alter the lights in any way.

Package Contents

Product Diagram

1. Winding mode switch
2. USB-C port
3. Charging light indicator
4. UV light power button
5. LED eye power button
6. Winder power button
7. 4-way articulating arm
8. Magnetic closure
9. Watch cushion
10. Acrylic window

Operation

We recommend a full charge prior to use. While charging, the indicator light is red. Once fully charged, the light will turn green.

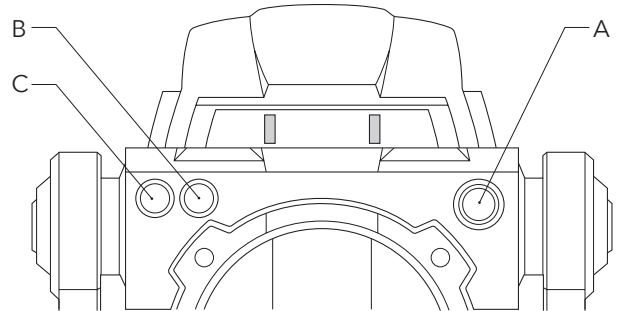

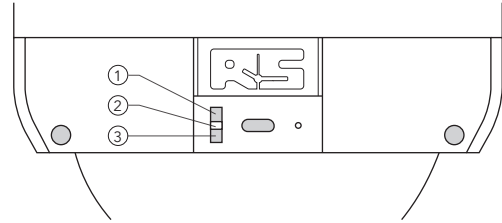

There are three winding settings:

1. Clockwise 700 TPD
2. Clockwise, counterclockwise 700 TPD
3. Clockwise, counterclockwise 1100 TPD

Press power button A to start the winder. It will stay illuminated while the winder is on. Press again to turn off.

Press power button B to turn on the LED eyes.

Press button C to turn on the UV lume charger. It is not recommended to leave the UV light on for prolonged periods of time.

FAQ

Will a watch winder be harmful to my watch?

No, when used properly, a watch winder will cause no harm to your watch. A watch movement requires a minimum number of turns per day (TPD) to keep running. Most watches have a safety mechanism to prevent the over-winding of the mainspring, so if the minimum TPD is exceeded, no harm is caused.

How long does the battery last?

The battery can 5+ days of continuous winding depending on TPD setting and LED usage.

What warranty does it come with?

The RW1 comes with a 6 month limited warranty which starts on the date of shipment. This limited warranty covers any manufacturing or workmanship defects that might occur. Please visit our website for full terms and conditions.

We hope you enjoy your new RW1.
